## DETAILED ACTION

### *Specification*

Claims 18-20 are objected to because of the following informalities:

Claim 18 reads "A method" and the claims depending therefrom should read

"The method".

Appropriate correction is required.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9-11 of U.S. Patent No. 6,727,452. Although the conflicting claims are not identical, they are not patentably distinct from each other as the instant claims are merely a broader version of the '452 claims. Further, one has ample motivation to broaden the '452 claim scope---namely, to obtain broader coverage. Therefore, it would have been obvious at the time the

invention was made to a person having ordinary skill in the art to modify the invention of the '452 to obtain the broader claim scope as presently claimed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over King et al. ("King") in view of Keck et al. ("Heck")(US 5,485,002).

King (Abstract; fig. 1; col. 1, ln. 10-22; col. 2, ln. 62-col. 3, ln. 22) teaches all that is claimed except for expressly teaching acquiring imaging data with a camera. Further, under an alternative interpretation, King may not teach the feature of a predetermined range of wavelengths. Heck, however, teaches the use a scanning camera (30) to detect defects in fruit (Abstract) and also teaches that it is known to use a specific frequency to create a better image for the camera (col. 9, ln. 23-67). Moreover, Heck teaches that the use of a scanning camera and the associated system provides more accurate image data to examine defects in citrus fruit (col. 1, ln. 16-col. 2, ln. 63). Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to replace the photodiode feature of King with the camera system taught by Heck to obtain a more accurate sorting device.
